

# Steps to Success

The Supported Employment Department of Mental Health America

## Who we are

Steps to Success is a program at Mental Health America that helps persons with mental health and/or other disabilities gain and maintain successful employment in the private sector. We work with private sector partners to make sure that both our clients and the organizations for which they work prosper as a result of their relationships. We are contracted with The Kentucky Office of Vocational Rehabilitation to place clients approved for service by that organization.

## The Bottom Line

Choosing to employ persons with disabilities can be of great benefit to your organization. Our clients greatly appreciate the work opportunities provided by our private sector partners, and work in a manner reflecting this attitude.

We can communicate closely with employers to facilitate the optimum productivity of our clients. We closely monitor client outcomes and act as a sounding board for client issues in life and at work. Our mission and our task is to support our clients throughout their working lives.

## Our Commitment to You

We consider our relationships with our community partners to be long-term in nature. Our clients do well when you do well. We are there to make sure that it works, that the relationships between our clients and our community partners becomes and remains of maximum benefit to both.

We look forward to meeting a representative from your company to further discuss our program and how your organization can benefit from our services. Contact Supported Employment
